DENTURES

Comfortable, natural looking replacement teeth

A denture is a removable plate that replaces missing teeth. A well made denture restores your smile, supports your lips and cheeks, and helps you eat and speak with confidence.

BEFORE AND AFTER FULL ARCH RESTORATION. RESULTS VARY

THREE MAIN TYPES OF DENTURE

At LUSSO dentures are designed with care for comfort, fit and appearance. Teeth are chosen to suit your face, and the denture is tried in before it is finished, so you can see and approve it.

YOUR OPTIONS

Types of denture

TYPE	WHAT IT IS	GOOD FOR
Acrylic partial	A pink acrylic plate replacing one or more teeth, held by clasps.	Replacing a few teeth at a sensible cost, or as a first denture.
Cobalt chrome	A thin, strong metal framework with acrylic teeth.	A slimmer, lighter and more stable partial denture.
Flexible	A thin flexible nylon base with gum coloured clasps.	Discreet partial dentures with no metal visible.
Full acrylic	Replaces all the teeth in an arch.	When no natural teeth remain.
Immediate	Made before teeth are removed and fitted on the same day.	Never being without teeth. Relined once the gums settle.
Implant retained	Clips onto two to four implants.	Loose dentures, especially lower dentures.

YOUR TREATMENT JOURNEY

How it works

01 **Assessment**
We examine your mouth, gums and any remaining teeth, and talk about what you would like.

02 **Impressions**
Accurate impressions or scans of your mouth are taken.

03 **Bite and tooth choice**
We record how your jaws meet and choose the shade, shape and size of the teeth.

04 **Try in**
You see the denture in wax before it is finished, and changes can be made.

05 **Fit**
Your denture is fitted, checked for comfort and bite, and you are shown how to care for it.

06 **Review**
A review a week or two later to ease any sore spots.

Most dentures need four to five visits over several weeks.

AFTERCARE

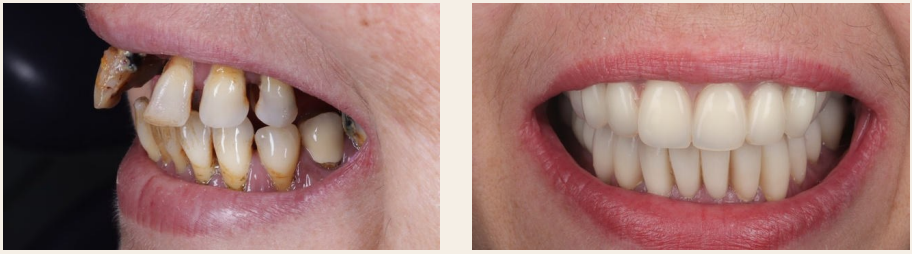

Living with your denture

- It is normal for a new denture to feel bulky at first. Most people adapt within a few weeks.
- Start with soft foods cut into small pieces, chewing on both sides at once.
- Speech may feel different for a few days. Reading aloud helps.
- Take dentures out at night to rest your gums, unless advised otherwise.
- Clean your denture daily with a soft brush and denture cleaner, not toothpaste, which scratches.
- Store it in water or a soaking solution so it does not dry out or warp.
- Keep regular checkups, as gums and bone change shape over time and dentures may need relining.

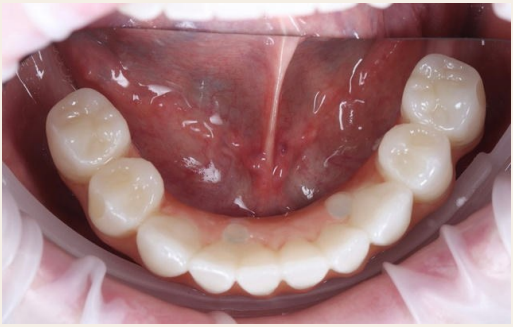

Considering implants? If your denture moves when you eat or speak, an implant retained denture can make a remarkable difference. Ask about it at your assessment.

BEFORE AND AFTER

A real case

BEFORE (LEFT) AND AFTER (RIGHT) A FULL ARCH RESTORATION. RESULTS VARY

AN IMPLANT RETAINED LOWER DENTURE FROM ABOVE

PREPARING

Before your new denture

- If teeth need to come out, we will plan whether you have an immediate denture or wait for healing.
- Bring your old denture to every appointment so we can copy what you like about it.
- Allow several visits over a few weeks for impressions, bite records and try ins.

THE FIRST WEEKS

After your denture is fitted

WHEN	WHAT TO EXPECT AND DO
First 24 hours	With an immediate denture, keep it in overnight unless told otherwise, to protect the healing gums.
First week	Sore spots are common. Do not adjust the denture yourself. We will ease it at your review.
Weeks 2 to 4	Speech and chewing improve as your muscles adapt. Practise with soft foods.
3 to 6 months	After extractions, the gums shrink and an immediate denture usually needs a reline.
Every year	Check ups for your gums, mouth and denture fit, even with no natural teeth.

GUIDE FEES

What it costs

TREATMENT	GUIDE FEE
Acrylic partial denture	from £950
Full acrylic denture, per arch	£1,250
Cobalt chrome denture	£1,750
Flexible denture	£1,350
Denture reline or repair	from £150
Implant retained denture, per arch	from £6,500

Guide prices. Your exact plan and fees are confirmed in writing at your consultation, and nothing starts until you have agreed to it.

FREQUENTLY ASKED QUESTIONS

Your questions answered

How long does a denture last?
Usually five to ten years, but the gums and bone change shape over time, so relines or a new denture may be needed sooner.

Will people know I wear a denture?
A well designed denture looks natural. Teeth are chosen to suit your face, and flexible clasps can avoid visible metal.

My denture is loose. What can I do?
A reline can improve the fit. If it is still loose, an implant retained denture clips onto implants and stays firmly in place.

Can I sleep in my denture?
We usually advise taking it out at night to let your gums rest and reduce the risk of infection.

Can you repair a broken denture quickly?
In many cases, yes. Contact us and we will advise on the fastest option.

Should I use denture adhesive?
A well fitting denture should not need it, but a small amount can add confidence. If you need more and more, the denture probably needs relining.

Can I eat normally?
Most foods, with practice. Cut food into small pieces and avoid very sticky or hard foods.
