FREQUENTLY ASKED QUESTIONS

Digital Smile Design and Trial Smile: your questions answered

Digital Smile Design uses photos, video and a 3D scan of your teeth to plan a new smile on screen. A trial smile is a temporary mock up placed over your teeth so you can see and feel the planned shape, with no drilling.

FREQUENTLY ASKED QUESTIONS

Your questions answered

What is Digital Smile Design?

It is a planning process using photos, video and a 3D scan to design changes to your smile on screen. It helps you see options before you decide on treatment.

Will my final smile look exactly like the design?

The design is a guide, not a guarantee. The final result depends on the treatment you choose and how your teeth and gums respond, but we aim to follow the agreed plan closely.

Does the trial smile damage my teeth?

No. No tooth preparation is needed. The mock up sits over your teeth and comes off afterwards.

How long can I wear the trial smile?

It is usually worn for the visit only. It is not designed for eating and may stain or come off, so it is not a long term option.

Do I have to go ahead with treatment?

No. The design and trial smile help you decide. You are welcome to take time to think and ask questions.

What will my photos be used for?

Your photos and videos are stored securely in your clinical record for planning. We will only use them for marketing if you give separate written consent.

What treatments can be planned with it?

It can help plan whitening, clear aligners, composite bonding, porcelain veneers and crowns, often in combination.

Is the design fee taken off my treatment?

Your treatment plan will set out all fees clearly. Please ask us at consultation how the design fee applies to your plan.
